

INSTALLING WINLINK EXPRESS

To install Winlink Express (formerly called RMS Express) go to <https://www.winlink.org/>

Click on "My Account"

Read the instructions under "How to Get an Account." Note that you will be prompted to create a Winlink account when starting Winlink Express for the first time and will need to follow the instructions.

Under "How To Get an Account" Item 1, click on "Winlink Express" in the second sentence.

On the "Winlink Express" page, go to the bottom "Download" and click "[Winlink Express \(current production version\)](#)".

The install window will open. Select "Open with Windows Explorer" then click "OK". Follow the defaults.

Please see the YouTube video below and follow their lead.

Beginners Guide to Setting up Winlink

<https://www.youtube.com/watch?v=fO730gfzYko>

After the install is complete go to the desktop and launch "RMS Express"

The Winlink Express Properties page will open to enter the required information.

Enter your call sign, a password, recovery email address and grid square.

To locate your grid square, go to the link below and enter your street address:

https://www.levinecentral.com/ham/grid_square.php

Note the information on the right of the Winlink Express properties page are optional, but helpful.

See the Telnet Basic.doc for instructions on sending an email via telnet (Internet).

The next time you launch RMS Express, you will be asked to make a donation, which you can do or you can click remind me later.

If you need to see your Winlink properties click on "Settings" then "Winlink Express Setup".
